FROM THE PRESIDENTS DESK

As of now little has been accomplished in regard to the noise and dirt of construction. It may take court action to reduce the noise of the dump trucks in the area off of Silver Oak and Kim. We will continue to work with management to try to correct this problem.

The new Post Office (when it is done) will cost each box user \$100.00 to help defray the construction costs. This charge is now being collected from new buyers of lots. It will be an add on charge to the purchasers of any of the older homes. This Post Office will be a full service unit, but will be staffed by O.B.G. employees. So the \$100.00 charge will be used to help pay these bills.

Unit 8 Plat was approved by the Lady Lake Town Board on October 14th. There are 508 lots in this unit.

Property deed restriction violations should be reported on a formal complaint form from the liaison officer of your area. Other complaints are to be treated the same way. Return them when completed to your liaison officer.

GOLF-A-THON FOR CYSTIC FIBROSIS

DATE: OCTOBER 26, 1985

TIME: 7:30 a.m.- Pancake breakfast, cooked and served by
the Lady Lake Kiwians Club. (Dutch Treat)

8:30 a.m.- Tee-Off Time

1:00 p.m.- Hot Dogs & Beer in the Club House,
with music by Fat Jack.

During the month of October everyone who wants to play in the Golf-A-Thon will go by the Orange Blossom Gardens Recreation office and pick-up your pledge sheets. Have your friends and neighbors sign your sponsor sheets, pledging to pay 1¢, 5¢, 10¢, or etc. for each stroke you have. Proceeds to go to Cystic Fibrosis.

We will have a hole-in-one jackpot, each player that wants to enter will pay \$1. The player that makes a hole-in-one, or comes closest will receive $\frac{1}{2}$ of the pot, with the remainder going to Cystic Fibrosis.

Cystic fibrosis (CF) is an inherited disease of children, adolescents and young adults. In the United States, CF is the number one genetic killer of children and young adults. CF affects the exocrine, or externally secreting, glands of the body. These glands produce secretions which enter organs of the body such as the lungs, and intestines, and skin through special ducts. The majority of the exocrine glands are mucus-producing: others include the sweat and salivary glands. The exocrine glands and their secretions are important for maintaining normal functions of the body.

In CF, mucus-producing glands fail to produce normal, free-flowing fluid. Instead, they secrete thick, sticky mucus which tends to block ducts and other passageways in the body. This abnormal mucus accumulates in various parts of the body, particularly in the lungs and intestines, and interferes with the vital body functions such as breathing and digestion. As a result of CF, the secretions of the sweat glands contain an excessive amount of salt, which can present problems such as dehydration during periods of increased sweating.

CHAPEL'S OCTOBERFEST IS OVER

Yes, the Octoberfest is over, but I am sure it is not forgotten. It was a beautiful day and we had a great time. People everywhere.

The bake sale was sold out, the food was sold out also, and very early. We must have had alot of hungry people around.

We also had an ample supply of merchandise of all descriptions and every table was BUSY, BUSY BUSY.

The plant table sold out early also. We must have alot of people decorating their homes with this fine greenery.

Everyone made a tremendous contribution to the Chapel Building Fund. I am sure there will be news as to the amount received for the Building Fund. I know the Ways and Means committee is very thankful to all who contributed to this great day, by giving, selling, baking, cooking, serving and buying.

God Bless you all.
